Subject: FW: RFAAP New Tenant Waste Treatment Request

Wednesday, December 03, 2014

Matt:

The Virginia Department of Environmental Quality (DEQ) is in receipt of the Radford Army Ammunition Plant's (RAAP) request to treat the tenant, Grucci's four specifically designated D003, hazardous wastes by incineration and open burning in accordance with the respective RCRA, hazardous waste permits. The request was transmitted as attachments (2) to the RAAP's e-mail and was received on November 24, 2014. The request is approved as detailed below.

The RCRA hazardous waste, Open Burning Ground (OBG) and Incinerator permits allow tenant waste to be burned. All of the four waste streams (analogous to Groups, 10, 17, 18, and 20) requested for treatment meet the criteria of Tables 1 and 2 of Attachment II.B, Table II.B-1 of Module III, and Section III.B.3 of Module III for open burning treatment in the Radford Army Ammunition Plant OBG permit. The waste stream analogous to Group 10 is approved for treatment by incineration as it was demonstrated by the submitted data to meet the criteria under the Waste Analysis Plan, Attachment II.B, of the hazardous waste Incineration permit. The data in support of the proposed waste streams to be burned is substantially similar to waste burned in the recent past in the respective units.

Please let me know if there are any questions or concerns with regard to this approval.

Respectfully,

Russ

Subject: RFAAP New Tenant Waste Treatment Request

Mr. McAvoy – Attached you'll find a written request to begin to treat wastes generated by an on-site tenant at our Permitted Incinerator and Open Burning Grounds. Please contact me if you have any questions or need further information to approve this request.

Thank you and have a wonderful Thanksgiving Holiday,

Matt
